

Back Pain and Massage

How Bodywork Can Help

Karrie Osborn

Whether it's a pulled muscle from yoga class or an afternoon basketball game, or a long-term pain caused by injury, most of us will come to know the beast that is called back pain. In fact, when it comes to low-back pain specifically, researchers say that 70-85 percent of the population will experience it at some point in their lives.

Causes of Pain

Experts say the cause of back pain can be the result of several factors. High on the list is stress. When our body is stressed, we literally begin to pull inward: the shoulders roll forward and move up to the ears, the neck disappears, and the back tightens in the new posture. "It's an

ergonomics, lack of exercise, arthritis, osteoporosis, a sedentary lifestyle, overexertion, pregnancy, kidney stones, fibromyalgia, excess weight, and more can contribute to pain.

Geoffrey Bishop, owner of Stay Tuned Therapeutics in Flagstaff, Arizona, says mechanics is the main cause of back pain that he sees in his practice. "It's mechanics, including repetitive use and ignorance about preventative postures, and neglect by employers and employees to provide rest and recovery." The past also plays a part, he says. "Old injuries and traumatic events, left untreated and unresolved, seem to dictate where stress lands in the back as well."

Studies show that massage therapy helps reduce back pain more than some medications.

armoring effect," says Angie Parris-Raney, a Denver-based massage therapist who specializes in deep-tissue massage and sports therapy. "That protective mode, with the muscles in flex, can even result in visceral problems," she says, where the pain also affects internal organs.

In addition to stress, poor posture, bad

Massage Offers Hope

Those who suffer with back pain know there are no easy answers for chasing the pain away. Physical therapy has proven effective for some sufferers, as has chiropractic and acupuncture, but massage therapy is also making a name

for itself when it comes to providing relief. In fact, research has shown that massage can be a great friend to the back-pain sufferer.

"Massage therapists have long treated low-back pain safely and effectively," says Les Sweeney, president of Associated Bodywork and Massage Professionals. "They have done so less expensively and less invasively than is possible with other treatments."

In fact, a study by the Group Health Research Institute in Seattle found that massage was more effective at treating low-back pain than medication. Patients who received massage once a week for 10 weeks were more likely to report that their back pain had improved, and improvements were still present six months after the study. Other research from the University of Miami School of Medicine and the Touch Research Institute showed that massage can decrease stress and long-term pain, improve sleep and range of motion, and help lower the incidence of depression and anxiety that often accompanies back pain.

For Parris-Raney's clients, the length of pain relief provided by massage therapy varies depending on the condition they are experiencing. Getting on a regular massage schedule, however, has really helped her clients manage the back pain, she says. When they go past their normally scheduled appointment, "their bodies know it's time to get a massage again." Whether it's just helping clients get through the day, or reminding the stressed-out office worker to breathe, Parris-Raney says massage can play an important part in back pain relief.

Whitney Lowe, owner of Oregon's Orthopedic Massage Education and Research Institute, says the benefits of massage for back pain depend on the primary cause of the pain. "If it is predominantly muscular pain, then massage has a great deal to offer in reducing pain associated with chronic muscle tightness, spasms, myofascial trigger points, or those types of problems. If it's something caused by a joint alignment problem or compression on a nerve, for example, then the role of massage might be somewhat different, such as helping to address the biomechanical dysfunctions,

but not really being able to get pressure off the nerve itself."

Massage Works

When it comes to back pain, there are a lot of options out there. Ultimately, massage, and its myriad benefits, might be a viable answer. For back pain sufferers, Parris-Raney says massage can work wonders. "Massage can help relax the body, relax the psyche, and improve a client's range of motion and circulation to the affected tissues," she says. Not only can massage help directly with the pain, but it can also make life a little easier, too. "Massage lets you tap into the parasympathetic system," she says, "and tap into all the good hormones that help you sleep better and help you handle stressors along the way." All of that helps in building a healthier back and a happier you.

Benefits of Massage

From stress relief to skin rejuvenation, the benefits of massage are extensive. When it comes to managing back pain, however, there are some specific benefits touch therapy can offer:

- Improved circulation. With increased circulation comes faster recovery time for sore, overworked muscle tissues.
- Increased release of endorphins. The prevalence of these natural painkillers is boosted every time you have a massage. This can only help in managing pain.
- Improved movement. Range of motion and flexibility both get a boost with massage.
- Increased relaxation. When you relax, your muscles relax, thereby calming the pain.

Be sure to communicate with your massage therapist if you are experiencing back pain.

De-stressing the Commute

Turning Road Rage into Road Sage

The average American commuter spends an hour a day driving to and from work. During this stressful, stop-and-go time, it's likely that blood pressure increases, adrenaline begins pumping, and muscles constrict and tighten. By the time you get home, you're wiped out and grumpy, and you have less to offer to those you come home to. If this sounds familiar, recognize that you have the power to reduce commuter stress. Here are a few tips to make your commuter time contribute to -- rather than detract from -- your life.

- Employ adjustable back cushions, pillows, wedges, and lumbar supports for a more comfortable commute. For more information, check out www.relaxtheback.com.

- To successfully sidestep the late-afternoon slump often caused by the stress hormone cortisol, keep some healthy snacks within arms reach. Celery, string cheese, water, and nuts -- especially almonds -- are good options

for the drive home.

- Borrow books-on-tape/CD from the library. Consider purely entertaining novels to ease the intensity of your drive.

- Learn a foreign language. Libraries also loan out these types of tapes and CD, too.

- Use your commute as an opportunity for spiritual or emotional growth. When stressing about a traffic jam, remind yourself that it's completely out of your control. Remember, attitude is everything.

- Practice breathing. When stress occurs, breathing becomes shallow and constricted. Taking full, deep breaths gives the body more oxygen, helping to regulate physical and mental function. Exhaling fully releases tension and built up toxins.

Go: *Calming Techniques for Your Hectic Life* (New Harbinger Publications, 2001) by Mina Hamilton.

Creativity goes a long way on your commute.

Easing Holiday Angst

Five Stress Busters for a Joyous Season

You enter the holiday season with the best of intentions -- looking forward to time spent with family and friends, decorating, shopping, baking. But as soon as you pile holiday activities on top of an already busy life, you're likely to find yourself relating more to Ebenezer Scrooge than Martha Stewart.

Consider these five suggestions to keep holiday stress at bay:

1. DETERMINE A SHOPPING BUDGET

For many, gift giving is an important part of the holidays, serving as a way to express love and appreciation for friends and family. But when the credit card bills arrive in January, you may discover you've extended your holiday stress well into the New Year. Plan your budget in advance, determine what you can spend, and stick to the plan.

2. CREATE A TIME BUDGET

Many will make a shopping budget, but what about making a time budget? Before accepting every invitation this year, decide ahead how many parties you can and want to attend while maintaining your sanity. Make choices about your time commitments based on what you'd really like to do this year, rather than what you think you should do or what you've always done. Don't forget to leave time for yourself.

3. SET FOOD-INTAKE BOUNDARIES

You'll likely be tempted to eat in excess, and don't be too hard on yourself if you don't stick to your pre-holiday eating standards. But do decide ahead of time just how much you'll deviate from your eating routine.

4. STICK TO YOUR EXERCISE REGIMEN

Regular exercise is a powerful stress buster. You'll feel better, sleep better, avoid weight gain, boost your immune system, and maintain a positive outlook about yourself. While it may seem like an easy time concession to make, don't give in to the idea. Stick to exercise, and you'll thank yourself for it.

5. TAKE TIME TO REST

Take time from your schedule to honor the cycles of the season. The holidays fall during winter solstice -- the shortest day of the year. Learn from nature, and get plenty of rest.

OFF THE TABLE AND OTHER NEWS

Merry Christmas (or whatever greeting best suits you) and a Happy New Year to all of you. I hope you've found this first, Dec 2021, issue of OFF THE TABLE beneficial and enjoyable. I plan to release issues quarterly, so watch for the next one in March.

Thank you for trusting me with your patronage this year. My Elite Massage is growing and, as promised, more hours will be available in the New Year. You can find the new schedule that begins January, 2022 on page 1.

Fridays and other times not listed may be available by sending your requested time to Kevin@MyEliteMassage.com

Microcurrent to treat scar tissue will be a new massage selection in January. Check the website for details.

I look forward to serving you throughout this coming year and I hope to see you soon!

Kevin
